Installation and Setup: Windows XP and above Requirements: DVB tuner (e.g. FastEC-1201) FastSatfinder is a handy and reliable program that can ease the setup of a satellite system by providing a collection of utilities that can help you find the signal from a specific satellite, as well as to monitor the signal strength in real time. FastSatfinder works with a wide array of DVB tuners, this being the sole requirement that grants a successful runtime. It uses a special proprietary algorithm, combined with ProgDVB Engine in order to provide support for a generous list of DVB devices. Following a short installation process, you will get acquainted with the user interface, which sports an attractive appearance, remaining intuitive throughout your whole experience with it. First and foremost, you need to select your device model from the dedicated section and press the 'Start' button in order to initiate it. Then, you can navigate to the Satellite list, where you can choose the one you wish to use. The program also bundles a collection of transponders that you can add to your device, as well as possibilities to configure DiSEqC related parameters. A special feature is the dish alignment module that performs calculations related to the antenna's azimuth and elevation angle, as well as the polarization tilt angle, which can be used to make a better positioning of the antenna for better signal. The program also offers real-time data about the signal strength, making you aware when it is weak so as to be able to make the necessary adjustments in order to improve it. Overall, we can safely state that FastSatfinder can make your life easier if you're dealing with a DVB tuner that cannot connect to various satellite setups. It benefits from a powerful engine that does not fail to provide the expected results. FastSatfinder Description: Find and monitor the best satellite signal. This is the easiest to use of the DVB tuner software packages we have tested. It does its job reasonably well. But there were a few shortcomings. This software needed to be updated more frequently. There were times when updates were not downloaded, and there were times when I had to reinstall the software to get it to work again. Read more FastSatfinder reviews Very easy to use, but needs updating I had only used this software for a few days, and was already liking it. But I quickly learned that to get updates, you had to go to a web page and download a "patch file". But some of those needed 6a5afdab4c
